PROFESSIONAL SUMMARY

Passionate and detail-oriented Full Stack Developer with hands-on experience in the MERN stack. Skilled in building scalable web applications that deliver real-world solutions and optimized user experiences. Adept in both frontend and backend development, UI/UX, and performance optimization. Strong focus on teamwork, modern development tools, and best coding practices.

WORK EXPERIENCE

- **Full Stack Developer** at **Xenara AI** • Remote *(Sept 2024 - Present)* - Built and optimized Xenara's AI-powered customer engagement platform using MERN, Next.js, NestJS, and Material UI. Delivered scalable full-stack features and enhanced UX across real-time support channels.
- **Web Developer** Intern at **OpenVoiceHub** • Remote (Apr 2024 – Sept 2024) - Developed full-stack features using MERN and contributed to responsive UI components. Collaborated with the team to improve performance and deliver a seamless user experience.
- **Frontend Developer** at Netbreeds **International Software Company** • Remote (2023-2024) - Built reusable and responsive components using React and Tailwind CSS. Enhanced frontend UX and maintained modular code standards.

PROJECTS

- **Issue Tracker**
  Built an Issue Tracker web application using Next.js 15 — designed to help teams efficiently manage, track, and organize issues within projects.This app includes features like issue creation, dynamic filtering, authentication, and real-time error monitoring using modern full-stack technologies.
- **GameHub**
  Built a responsive video game discovery platform using React 18, TypeScript, and the RAWG API. Features include dynamic search, genre/platform filtering, sorting, and dark mode. Implemented reusable components and custom hooks for clean architecture and scalability.
- **Personal Blog**
  Check out my personal blog website.This is a modern blog platform built with Next.js, TypeScript, and Tailwind CSS. It features dynamic content rendering, responsive design, and advanced styling techniques, offering a seamless user experience for tech tutorials, interview preparation, and industry insights.
- **Xenara AI** *(Case Study)*
  At Xenara AI, I'm working as a Full Stack Developer where I've contributed to building and maintaining a modern, scalable web platform. My work spans across the MERN stack, Next.js, and NestJS, handling both client-side and server-side logic.
